This year's tour will be hosted at the Mt. Shasta Best Western Hotel located in Siskiyou County. Discussion topics will cover: herbicide treatments, long-term forest projects and site prep. Though managers share common challenges in the region, each ownership has unique approaches. Herbicides play a key role. Specifically, we will see:

- Results of bare ground herbicide treatments
- Effects of lifting dates and storage duration on field performance of Douglas-fir seedlings
- Delayed study release of ponderosa pine
- Helicopter and hand application
- Herbicide and brush study on ponderosa pine growth and survival
- Invasive weeds

There will not be a golf tournament this year.

Note: The California Forest Pest Council Insect and Disease Field Tour will take place during the tour on each day.
